CAREER OBJECTIVE

To succeed in an environment of growth and earn a job which provides self development that help to achieve personal as well as organizational growth.

SKILLS

Languages: Java, React JS, Git

Technologies: Figma

AREA OF INTEREST

- Data Structure
- Web Development

PROJECTS

MERN — **Faculty Subject Expert Management System**
The web application serves as a comprehensive system for managing faculty records, encompassing personal and academic information. It facilitates the seamless retrieval of faculty details as needed.

React JS — **Portfolio Website**
My portfolio website provides a one-stop destination to learn about me, including my education, project showcase, and a dedicated contact page for easy communication.

MERN — **Online Clothes Shopping System (On going)**
The web application is mainly used for purchasing the products by the customer and then maintaining the user details and products by admin.

Google Colab — **Utilizing Deep Learning Techniques To Predict Drug Consumption from Eye Image**
We aimed to create a robust model to identify drug use through eye image analysis, using advanced algorithms like Inception V3, DenseNet-169, and EfficientNet-B2

Java — **Payroll Management System**
This application is used to is web application for maintaining students record and retrieving it for future purpose.

Figma — **Sign in and Sign up page using Figma**
It is a design for login and sign up page

EDUCATION
